Project Summary

Project Objective:
Monitoring the entire co-operation portfolio of the European Commission with the partner states in the New Independent States and Mongolia “TACIS programme”.

The main sectors to be monitored were:
- Agriculture
- Transport and telecommunication
- Development of human resources
- Privatisation, SMEs, financial sector
- Energy
- Environment
- Nuclear safety
- Small projects programme

The project portfolio encompassed 600 projects (including country components: up to 850 projects) financed by the EU with an annual volume of Euro 460 million. 1500 monitoring visits and reports were carried out/produced in the current contract.

The monitoring reports provided timely information to programme and project management staff at the European Commission for use in their decision-making process based on a standardised format, developed by INTEGRATION. The reports indicated to which degree a given project had achieved its stated objectives and results, or would have probably been able to achieve them.

Furthermore, INTEGRATION provided sectoral analysis in key areas of project operation in support of programme planning and enhanced training of staff at all levels engaged in the programme as well as project design and implementation.
