**Project Summary**

**Project Background**

**DECENTRALIZATION:**
Since January 2010, the GTZ, on behalf of the BMZ, has been implementing a program in Indonesia in order to enable the relevant, sub-national authorities to fulfill the principles of good governance through the demand-oriented realization of administrative and financial standards for the provision of decentralized public services.

**ENVIRONMENT AND CLIMATE CHANGE:**
At the same time, the GTZ, on behalf of the BMZ, has been implementing a program since January 2009, with the aim to enable the national government, Indonesian cities as well as industrial enterprises to both plan and implement new climate strategies and tools.

**EMISSION REDUCTIONS:**
Since December 2008, the GTZ, on behalf of BMZ, has been implementing a program with the objective to enable medium sized and larger Indonesian cities to plan and implement measures for environment, energy and climate friendly urban transport.

**Project Objectives**
The task of the project was the Impact Monitoring of all three program components

- Decentralization as contribution for Good Governance (DeCGG),
- Policy Advisory for Environment and Climate Change (PAKLIM),
- Emission Reduction of urban transport (SUTIP),

as well as the knowledge management for the DeCGG component.

The aim was to enable the program components to determine the relevance and alignment of activities, capacities and impacts, considering strategies, cooperation, controlling structures, processes as well as learning and innovation, through an implementation of a monitoring system. An evaluation should provide information that is credible and useful, enabling the incorporation of lessons learned into the decision-making process.

**Project Activities**
The project supported the implementation of M&E activities in the GTZ program components “DeCGG”, “PAKLIM” and “SUTIP”. The main activities involved:

- Assistance in the elaboration/revision of the implementation of an adopted, impact-oriented monitoring system;
- Development of data collection templates and formats;
- Organization and implementation of data collection;
- Capacity building of project personnel and partners;
- Reporting to ministries and GTZ;
- Support in the Preparation of NAMAs on the national level and for industry, cities and communities with regards to MRV-Standards.

**Services Provided**

- Impact oriented monitoring
- Capacity Development for participating projects
- Knowledge management for the DeCGG
- Reporting
- Support for Preparation of NAMAs on the national level and for industry, cities and communities with regards to MRV-Standards
- Project Management
